NEW ERA OF PREGNANCY AND POSTPARTUM EXERCISE

Pain relief

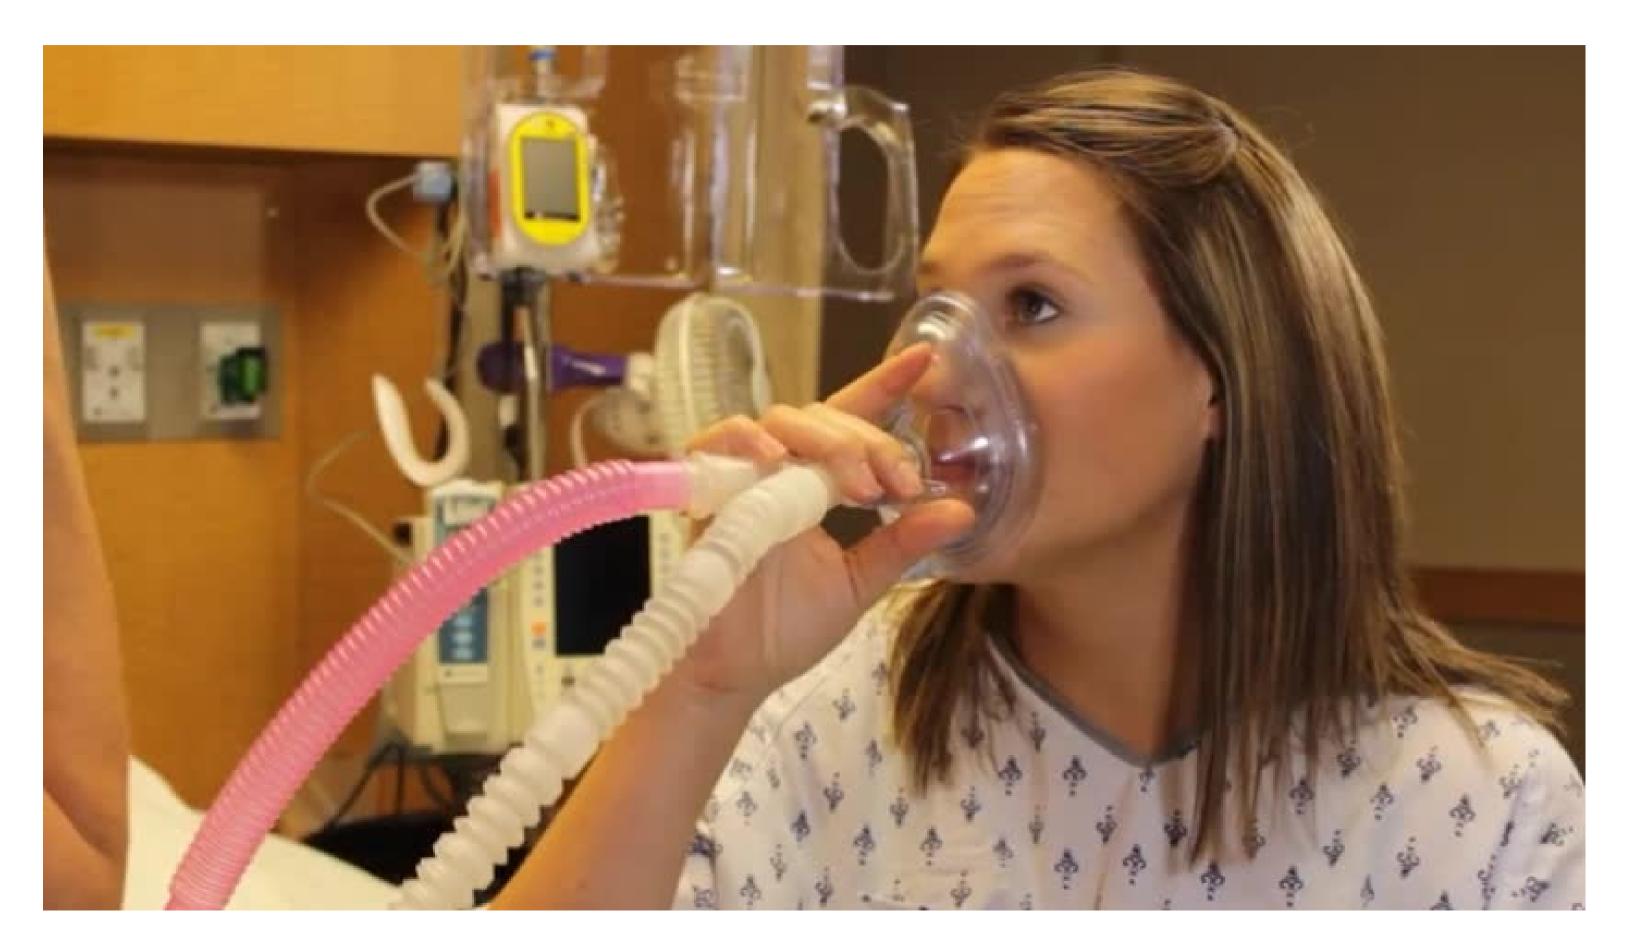

Back massage

Tens machine

Entonox

Petidine

It takes about 20 minutes to work after the injection. The effects last between 2 and 4 hours, so would not be recommended if pregnant women are getting close to the pushing (second) stage of labour.

to be best in any point of view. **Morphine** ['mor narcotic drug ex habit-forming n to reduce pain; for what is thou

Epidural

Breathing and positions during labour and delivery

Birth balloon

Breathing

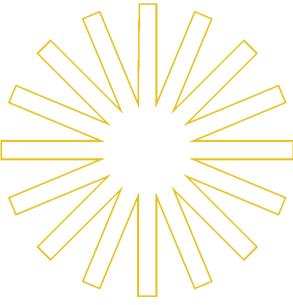

As the contraction builds up, breathing becomes faster at the peak of the contraction. Blowing out should be performed in a slowly way. www.neppe.awfis.net
